

Security is our signature feature

Evolution Series devices have three security levels. Our highest available setting makes your device a force to be reckoned with.

We earned the **BLI Security Validation Testing** seal from KeyPoint Intelligence after our devices passed a **rigorous penetration testing protocol** involving both **automated and manual cyberattacks** on the device firmware and underlying operating system.

K-Level means security success

1 Elite security made simple

Rest assured your device is secure with our top security features available to set up quickly and easily.

2 Have eyes everywhere

Our Evolution Series MFPs detect unapproved changes or access, keeping your device and files safe from:

- Unapproved applications
- Malware attacks
- Code changes

3 An extra layer of protection

All data in the computer's memory is encrypted, including if any drive is removed.

4 Collaborate with confidence

Send and receive documents without worrying about prying eyes intercepting them.

5 All bases covered

With IP addresses and wireless networks covered, hackers will face extreme difficulty at entry point.

6 Secure

Rigorous penetration testing protocols involving both automated and manual cyberattacks on the device.
