

Kyocera Cloud Capture

Kyocera's smart cloud-based business software solution helps to digitise workflows, streamline processes, reduce daily costs and save time.

Introducing our cloud-based capture system

KCC is an intelligent document capture solution designed to streamline business workflows by digitising paper documents through a multifunction printer (MFP) and securely transmitting the data to a designated cloud destination.

This fast and efficient system allows small and medium-sized companies to save time, enhance productivity, and ensure the security of scanned and processed information.

How KCC overcomes common business challenges

This cloud solution addresses key challenges in digitising and managing documents, enhancing productivity for businesses transitioning to the cloud.

Streamlined document management

KCC simplifies document management by enabling direct scanning to cloud storage without the need for a PC. This saves time and simplifies data capture by removing the middle man.

Quicker data capture and storage

Our solution avoids timewasting from manually searching for files. Streamlined document capture and storage allows users to organise and access documents like invoices and contracts more easily.

More efficient data retrieval

KCC links documents with search information, making retrieval faster and more efficient, so companies don't overlook or misplace important data.

Reduced document management costs

As a cloud-based solution, KCC eliminates the need for costly on-premises infrastructure and maintenance, offering immediate deployment with 24/7 stability.

What are the benefits of KCC?

Kyocera Cloud Capture helps businesses to digitise, optimise workflows, and improve data governance.

Ease of use

KCC is quick to deploy, intuitive to use, and requires no management.

Reduced costs

No need for on-site servers or storage, less demand for consumables.

Complements workflows

KCC works well with the cloud environment you are already using.

Fast document access

Thanks to OCR, searchable file conversion and document indexing functionalities of KCC, it is easier to find needed information from documents anytime.

Reduce manual tasks

With KCC, document storage, indexing, and digitising are simple.

Get to know Kyocera Cloud Capture

With KCC, you can optimize your business operations by predefining scan workflows tailored to your needs. In addition to that, you can choose from secure login methods including ID card, PIN, or username and password.

Once documents are captured by an MFP, data can be processed through KCC features such as:

- Deskew
- Correct page orientation
- Full-text OCR
- Format conversion (such as searchable PDF and Office formats)

Available functionalities vary depending on the product package selected for use.

Then, captured documents and their data is outputted to a specified destination. You can select external systems such as:

- Kyocera Cloud Information Manager (KCIM)
- Google Drive
- OneDrive Business
- Sharepoint
- Email

Our cloud solution streamlines the scanning, converting, indexing, classifying and storing of all critical business documents. **This solution is ideal for many organisations:**

- Enterprise
- Back office
- Receptions
- Finance
- Banking
- Insurance
- All other businesses

Available KCC Plans

Functions	Trial Plan	Entry Plan
Free trial period (up to 1 year) for supported models*	✓	✗
HyPAS™ Client App called Scan to Cloud on supported models' device panel	✓	✓
Scan to Me (Scan to Email)	✓	✓
OCR full-text recognition	✗	✓
Manual Indexing on MFP panel	✓	✓
Various output file formats (PDF, TIFF, JPEG)	✓	✓
Scan document workflow management via Web-based central user portal (Available up to 6 workflows)	✓	✓
Initial File Name Setting on defined scan workflows	✓	✓
Direct and encrypted transfer to cloud storages (KCIM, Google Drive, Microsoft SharePoint, MS OneDrive Business)	✓	✓
Optional email notifications for executed scan workflow status	✓	✓
Access authorizations and login via PIN or IC/ID card	✓	✓
Logs & Reporting	✓	✓

KCC is ideal for your organisation if it wants to initiate its digitisation journey, if there are no or few IT managers in your company, or if paper documents remain operational.

Join the wave of digital transformation and discover how Kyocera Cloud Capture can help you optimise efficiency and maximise security.
